MSc Cybersecurity student at the University of Liverpool with a strong Computer Science foundation from BITS Pilani, Dubai. Experienced in cryptography, network security, digital forensics, and collaborative technical projects, with a focus on solving real world security challenges and delivering reliable solutions.

EDUCATION

University of Liverpool, *Masters of Science in Cybersecurity* 09/2025 – Present | Liverpool, United Kingdom
Relevant Coursework: Communication Networks, Privacy and Security, Digital Forensics, Safety and Dependability, Applied Artificial Intelligence

Bira Institute of Technology and Science Pilani - Dubai, 09/2021 – 09/2025
Bachelor of Science in Computer Science Engineering Dubai, United Arab Emirates
Relevant Coursework: Data Structures, Computer Networks, Data Mining, Blockchain Technology, Cryptography and Internet of Things (IoT)

EXPERIENCE

Elfit Arabia, *ERP and Data Management Intern* 01/2025 – 07/2025
Riyadh, Kingdom Of Saudi Arabia

- **Inventory Management and ERP System Optimization:** Streamlined inventory management at ELFIT Arabia by organizing, verifying, and uploading warehouse data into the ERP system (Odoo), improving accuracy and operational workflows.

Alrais Enterprises Group, *Software Developer Intern* 06/2023 – 08/2023
Dubai, United Arab Emirates

- **Front-End Development:** Designed responsive, mobile-first user interfaces using HTML5, CSS3, and JavaScript.
- **React.js Implementation:** Developed dynamic and interactive website features using React.js, ensuring modularity, maintainability, and scalability of the web applications.
- **Performance Optimization & SEO:** Enhanced search engine optimization (SEO) by incorporating meta tags, canonical tags, and social media tags.
- **WordPress Customization:** Built and customized webpages using WordPress themes and plugins.

PROJECTS

Two-Layer Cryptographic Framework for IoT Devices 09/2024 – 12/2024

- Developed a two-layer cryptographic framework tailored for IoT devices with limited memory, processing power, and battery life.
- Designed and implemented lightweight encryption algorithms (SIMON and SPECK) to ensure data security while maintaining energy efficiency.
- Achieved a scalable and cost-effective solution for securing IoT networks.

IoT Smart Irrigation System Using Machine Learning 09/2024 – 12/2024

- Developed a smart irrigation system combining IoT and Machine Learning (ML) technologies to optimize water usage in agriculture.
- Integrated IoT devices with cloud infrastructure to monitor real-time environmental conditions and predict water requirements.
- Implemented both automated and manual control options, ensuring scalability, efficiency, and cost-effectiveness.

Optimizing FMCG Supply Chains Using Predictive Modeling 02/2024 – 05/2024

- Built a predictive model using the XGBoost algorithm to optimize shipment quantities for warehouses in the instant noodles market.
- Analyzed historical data to minimize stockouts and overstocking, reducing storage costs and improving supply chain efficiency.
- Applied advanced analytics techniques to address real-world challenges in inventory management.

CERTIFICATES

|---|---|---|
| • Cybersecurity Job Simulation - Mastercard | • Software Engineering Job Simulation - J.P. Morgan | • Data Science Job Simulation - British Airways |
|---|---|---|

SKILLS

Technical Skills

Python, Java, HTML, CSS, JavaScript, React.js, SQL, MATLAB, Odoo, Microsoft Office

Soft Skills

Adaptability, Time Management, Attention to Detail, Problem Solving

Languages

English, Hindi, Urdu, Arabic (Beginner Level)
